

Re: the NJ do not call list, i receive calls late evenings when i am trying to put my children down to sleep. i receive calls early in the morning when i am juggling 3 kids (5yrs old and under). and i even receive calls on sundays. What about my privacy. Do you think its fair I have to pay to have my phone number changed, unlisted and blocked every couple of months. are you going to pay for this. what about my rights??? My mother-in-law doesn't answer her phone anymore in fear its another telemarketer. We have to leave a message and she calls us back. Why do we have to be unconvinced because greedy companies want to sell hard working americans "junk" that we are not interested in? Email and let me know WHY you are entertaining these telemarketers! and while you are at it, why don't you give your home phone number and cell phone number to these people and try to enjoy a evening after a hard day!
